

Alcor

A user interface for Mizar

Paul Cairns

`p.cairns@ucl.ac.uk`

`www.ucllic.ucl.ac.uk`

UCLiC

Goals

- ▶ User interfaces to MKM
 - VERY broad
- ▶ User focus: mathematicians
- ▶ System focus: digital library
- ▶ Task focus: creating new mathematics for library

Mizar as test-bed

- ▶ (Most) substantial library of formal maths
 - homogeneous
 - search/retrieval issues
 - significant resource
- ▶ Would mathematicians use it?

Alcor

- ▶ Working GUI environment for Mizar
- ▶ Very vague at this stage
 - principle rather than a system?
- ▶ Strong UCD approach...
- ▶ ... but need to start with a system

What's in a name?

- ▶ Mizar
- ▶ Alcor – companion
- ▶ “Horse & rider”
- ▶ Alcor sits on Mizar

“User” goal

- ▶ To add to the MML
- ▶ To draw on the library
- ▶ No encyclopaedic knowledge
 - 2000 definitions, 30,000 theorems!
 - verbosity (de Bruijn factor)

Barriers to goal

- ▶ What's in the library?
- ▶ What's like my theorem?
- ▶ Can I prove this “by ref”?
- ▶ What *is* the definition of compact?

- ▶ I am moving up these questions!

Alcor

Search

Working article

```

registration let T be TopSpace;
  cluster open Subset of T;
end;

registration let T be TopSpace, R be open
Subset of T;
  cluster R` -> closed;
end;

theorem :: TOPS_1:31
  S is closed & T c= S implies Cl T c= S;

theorem :: TOPS_1:32
  Cl K \ Cl L c= Cl(K \ L);

canceled;

```

C:\mizar\abstr\tops_1.abs

Search result

```

definition let X;
  mode Subset of X is Element of bool X;
end;

registration let X be non empty set;
  cluster non empty Subset of X;
end;

registration let X1,X2 be non empty set;
  cluster [: X1,X2 :] -> non empty;
end;

registration let X1,X2,X3 be non empty set;
  cluster [: X1,X2,X3 :] -> non empty;
end;

registration let X1,X2,X3,X4 be non empty set;
  cluster [: X1,X2,X3,X4 :] -> non empty;
end;

```

c:\mizar\abstr\SUBSET_1.abs

9 results: closed

Term	Location	Term Type
closed	BORSUK_1:def 14	Attr
closed	COMPLSP1:def 16	Attr
closed	PRE_TOPC:def 6	Attr
closed	QC_LANG1:def 30	Attr
closed	RCOMP_1:def 4	Attr

Previous searches:

Implementation

- ▶ Phrasier system
 - the plagiarists dream
- ▶ Keyword search
- ▶ Multiple methods of search

Pros and Cons

- ▶ Single focus of attention
- ▶ Context of search
- ▶ Gesture-based input is less expressive
- ▶ Tie-in to context

What's next?

- ▶ Better search algorithms
 - `<advert>` see my other talk! `</advert>`
- ▶ Work up to full editor
- ▶ Workbench for exploration

What about users?

- ▶ Me first!
 - attempt bits of my thesis
 - attempt to check some hard/technical maths
- ▶ What's the gap?
- ▶ Take out to other users

Thanks to...

- ▶ Paul
- ▶ Grzegorz
- ▶ Roman
- ▶ And you for your attention
